Restoring Salmon Habitat & Fish Passage

April 16-18, 2024

Penticton, BC

Registration fee: \$1000 per person

Outline:

- Learn the calculations behind stream analysis, river hydraulics and pool-riffle design.
- Field visits to several habitat restoration projects including field applications
- Learn the process of implementing a river restoration project from beginning-to-end (planning, designs, construction, and adaptive management).
- Instructors will explain the projects monitoring methods, results, and lessons learned.
- Discussion and poster sessions: hydraulic modeling, fish habitat diversity, spawning beds, riffles, fish passage at barriers, floodplain reconnection, wetland restoration.
- Learn Newbury riffle techniques.

About us

The Okanagan Nation Alliance in collaboration with many project partners have been successfully restoring spawning and rearing habitat for salmon in the Syilx Okanagan Territory for 20 years. Traditional Ecological Knowledge, best management practices, measured stream geometry and natural habitat features have guided these restoration works.
