

siwłk^w WATER WEBINAR:

WATERSMART LANDSCAPING IN A WATER-SCARCE REGION

JULY 15TH 2026

12:00PM – 1:00PM

WaterSmart Landscaping is about rethinking how we garden in an increasingly water scarce region. This presentation blends practical landscaping strategies with Syilx Okanagan Nation perspectives that view water as a relationship, not just a resource. We'll share simple ways to design beautiful, drought landscapes using native plants, healthy soils, and efficient irrigation—while respecting the land and strengthening biodiversity.

Eva Antonijevic is a biologist with the Okanagan Nation Alliance Water Program. A passionate gardener, she has worked with Friends of the Summerland Ornamental Gardens and the Okanagan Xeriscape Association, promoting practical, drought tolerant gardening practices through education and outreach.

**DELIVERED ONLINE VIA TEAMS,
REGISTRATION REQUIRED**
