Restoring Salmon Habitat & Fish Passage

April 27-29, 2027
Penticton, BC

Registration fee: \$1000.00 per person

Outline:

- Learn the calculations behind stream analysis, river hydraulics and pool-riffle design.
- Field visits to several habitat restoration projects.
- Learn the process of implementing a river restoration project from beginning-to-end (planning, designs, construction, and adaptive management).
- Instructors will explain the projects monitoring methods and results.
- Discussion and poster sessions: hydraulic modelling, fish habitat diversity, spawning beds, riffles, fish passage at barriers, floodplain reconnection, wetland restoration.
- Learn Newbury riffle techniques.

*Deadline -
April 15, 2027*

ABOUT US

The Okanagan Nation Alliance in collaboration with many project partners have been successfully restoring spawning and rearing habitat for salmon in the Sylx Okanagan Territory for 25 years. Traditional Ecological Knowledge, best management practices, measured stream geometry and natural habitat features have guided these restoration works.
